BOWL COVER

Specifications

Operating Pressure: 60 psig min.

The Bowl Cover is designed to seal the rim of a mixing bowl to allow product from a hopper above it to be transferred into the bowl while sealing in the associated dust.

The Bowl Cover Includes:

- Sanitary welded rugged steel frame.
- Pneumatic cylinder operates on compressed in-plant air.
- Manual control valve with adjustable flow controls.
- Filter-Regulator with gage to condition air to control valve.
- Adjustable vertically position to fit standard mixing bowls.
